Frontend software engineer specializing in responsive, user-centered web applications. Skilled in designing and developing polished, production-ready interfaces, focused on accessibility, quality, and visual consistency.

Experience

Frontend Web Developer Intern - SciQuel (*Typescript, Figma, React, CSS, GitHub*) November 2025 - Current

- **Frontend development** for a science media platform, enhancing overall visual consistency and identity across the company website.
- **Collaborating with designers and engineers** to translate design goals into responsive, accessible, and user-friendly web components using modern front-end tools.
- **Structured development workflow**, including code reviews, GitHub version control, and iterative improvements based on team feedback.
- **Gaining hands-on experience** in a real-world product development cycle, from ideation to deployment, within a cross-disciplinary, agile-style team environment.

Freelance Frontend Developer (*Figma, React, JavaScript, CSS, GitHub, Vercel*) Summer 2025

Live demo: jackgiancotti.com

- Built and shipped a **React + React Router portfolio** for a videographer client with 7+ custom sections, improving hero video load time by 35% through preloading strategies and poster fallbacks.
 - Engineered **responsive, accessibility-aware navigation** (anchors, router state, collapsible sidebar) to preserve user context across desktop and mobile breakpoints.
 - Developed **media-heavy galleries** (20+ photos, 7 videos) using lazy loading and lightbox overlays, maintaining sub-2s time-to-interactive on mid-tier devices.
-

Projects

Crypto Tracker (*React, CSS, REST API, Vercel*) 2025

Live demo: crypto-tracker-dashboard-ivory.vercel.app

- Built a **responsive cryptocurrency tracking app** with real-time search, filtering, and 7 sorting options across 100+ crypto assets.
 - Integrated **CoinGecko REST APIs** with asynchronous data handling, error management, and custom utilities for price conversion and large-scale number formatting.
 - Designed a mobile-first UI across 3 breakpoints, featuring animated **7-day price charts using Recharts** and smooth animations.
 - **Component-based frontend** with React Router, reusable UI components, and optimized client-side state initialization for seamless multi-page navigation.
-

Education

Bachelor of Science in Computer Science, UMASS Lowell

Expected May 2026

Minor in Graphic Design and Mathematics

Relevant Courses: GUI Programming, Web Design II, Data Structures & Algorithms, Object-Oriented Programming

Meta Front-End Developer Professional Certificate

Technical Skills

Frontend: **React**, JavaScript (ES6+), Typescript, HTML5, CSS3

Styling: Tailwind CSS, Bootstrap, Responsive Design, Accessibility (WCAG)

Design & UI/UX: **Figma**, Photoshop, InDesign, Illustrator

Backend: Node.js, Next.js, SQL

Tools: Git, GitHub, Visual Studio Code, Vercel

AI Tools: GitHub Copilot, ChatGPT, Cursor, Claude

More impact, less description

SciQuel — Frontend Developer Intern

- Shipped a staff-curated article recommendation feature with authenticated editing and responsive, accessible UI
- Later led the development of an interactive reading experience focused on science comprehension and content discovery

Recruiters LOVE hearing:

“I shipped early, then iterated.”
