Final-year Computer Science student experienced with building secure, responsive web applications. Passionate about scalable application development and delivering production-ready software.

Experience

Frontend Software Developer Intern - SciQuel (*React, TypeScript, Figma, CSS, GitHub*) November 2025 - Current

- Contributed to frontend development by implementing and refining React + TypeScript components from product requirements, resulting in steady improvements to the user experience.
- Improved UI polish and consistency by iterating on layouts, styling, and component behavior based on feedback, resulting in a cleaner, more cohesive interface.
- Supported maintainable frontend code by following existing patterns, organizing reusable components, and writing clear PR's, resulting in smoother collaboration and easier future updates.
- Strengthened team deliveries by participating in standups, planning, and code reviews, resulting in faster iteration and fewer integration issues.

Freelance Frontend Developer (*Figma, React, JavaScript, CSS, GitHub, Vercel*)

Summer 2025

Live demo: jackgiancotti.com

- Built and shipped a production React portfolio by designing a component-based architecture with React Router, resulting in 7+ maintainable sections with clean navigation.
 - Reduced hero media load time by 35% through preload strategies and poster fallbacks.
 - Improved performance for media-heavy pages by implementing lazy loading and interactive overlays, resulting in smoother UX on mid-tier devices.
 - Deployed a client-ready site by using GitHub + Vercel.
-

Projects

Crypto Tracker (*React, CSS, REST API, Vercel*)

2025

Live demo: crypto-tracker-dashboard-ivory.vercel.app

- Built a responsive crypto dashboard by implementing search, filtering, and 7 sorting modes, resulting in fast exploration across 100+ crypto assets.
 - Improved data reliability by integrating CoinGecko via async requests with error handling and utilities (price conversion, large-number formatting), resulting in cleaner, reusable data logic.
 - Delivered mobile-first UI clarity by designing across 3 breakpoints and adding animated 7-day charts with Recharts, resulting in an intuitive cross-device experience.
 - Scaled navigation and reuse by structuring routes with React Router and shared components, resulting in smoother multi-page UX and easier feature expansion.
 - Shipped to cloud hosting by deploying on Vercel with performance and maintainability in mind.
-

Education

Bachelor of Science in Computer Science, UMASS Lowell

Expected May 2026

Minor in Graphic Design and Mathematics

Relevant Courses: Data Structures & Algorithms, Object-Oriented Programming, GUI Programming, Web Design II

Meta Front-End Developer Professional Certificate

Technical Skills

Frontend: **React**, JavaScript (ES6+), TypeScript, HTML5, CSS3

Styling: Tailwind CSS, Bootstrap, Responsive Design, Accessibility (WCAG)

Design & UI/UX: **Figma**, Photoshop, InDesign, Illustrator

Backend: Node.js, Next.js, SQL, Java, C++, C#

Tools: Git, GitHub, Visual Studio Code, Vercel
