Frontend engineer and graphic design minor who takes features from Figma mockup to deployed React/TypeScript code. Currently shipping production work at SciQuel while finishing a Computer Science degree at UMass Lowell.

Experience

Frontend Engineer Intern - SciQuel (*Next.js, React, TypeScript, Prisma, NextAuth, Figma*) November 2025 - Current

- Responsible for the end-to-end development of the Staff Picks feature, where staff members highlight their favorite media content with a personal quote. Designed the full UI in Figma, building it out in Next.js, React, and TypeScript, including the display page and a staff dashboard that lets authenticated users create, edit, or delete their own picks.
- Improved UI and consistency by iterating on layouts, styling, and component behavior based on feedback.
- Kept the codebase clean and consistent by following established patterns and organizing reusable components, making it faster for the team to build on existing work.
- Participated in standups and code reviews as part of an Agile workflow, keeping releases on schedule.

Frontend Developer - Freelance (*Figma, React, JavaScript, CSS, Vercel*)

Summer 2025

Live demo: jackgancotti.com

- Improved hero media load time by **35%** using preload and poster fallback strategies, making a noticeable difference on slower connections.
 - Designed and built a production React portfolio from scratch, using React Router to create a smooth multi-page experience across **7+** sections.
 - Added lazy loading and interactive overlays to keep the site feeling fast even on media-heavy pages.
 - Handled the full deployment pipeline through GitHub and Vercel, from first commit to client handoff.
-

Projects

Crypto Tracker (*React, CSS, REST API, Vercel*)

2025

Live demo: crypto-tracker-dashboard-ivory.vercel.app

- Built a searchable, filterable dashboard for **100+** cryptocurrency assets with **7** sorting options and animated 7-day price charts using Recharts.
- Connected to the CoinGecko REST API using asynchronous JavaScript, with error handling and helper utilities to keep the data logic clean and reusable.
- Designed a responsive, mobile-first layout across 3 breakpoints that works intuitively across all device sizes.
- Structured the app with React Router and shared components, keeping the codebase organized and straightforward to extend.

Study Space (*Collaborative Project, React, CSS, Firebase, Github*)

Spring 2025

Live demo: gui-ii-studyspace.web.app

- Built the task list page and sidebar widget for a focus app, with full CRUD, drag-and-drop, and Firebase sync.
-

Education

Bachelor of Science in Computer Science, UMASS Lowell

Expected May 2026

Minor in Graphic Design and Mathematics

Relevant Courses: Data Structures & Algorithms, Object-Oriented Programming, GUI Programming, Web Design II

Meta Front-End Developer Professional Certificate

Technical Skills

Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Web Design, Accessibility (WCAG)

Styling: Tailwind CSS, Bootstrap, CSS Animations, Flexbox, CSS Grid

UI & Design: Figma, Adobe Photoshop, Adobe Illustrator, InDesign, Component Design

Backend: Next.js, Node.js, SQL, Java, C++, C, C#

Tools & Workflow: Git, GitHub, Vercel, Firebase, REST APIs, Agile, Code Review, VS Code, npm
